# FIRE DRILL

Mostly people learn about fire drill procedures while in school. When the building's fire alarm is activated, everyone would quickly and quietly follow their teacher outside and wait for instructions.

Every employee needs to be empowered with the correct information and training to protect themselves and the students around them. A mock drill was conducted for the entire staff of DPS Harni.

Experts demonstrated and teachers were made to do demo practice on how to use the fire extinguisher, fire alarm points and fire water hose and pump system.
